# WELCOME

As RVT's new Managing Director I am delighted to welcome you to the Spring edition of our magazine and a warm welcome to our new customers who we have met in recent months, and will possibly be receiving this magazine for the first time.

In my six years with RVT I have been proud to be involved in the development and expansion of the company, with a team who I believe is the best in the business. For customers who I am yet to meet, the RVT team are looking forward to working with you to make sure you are achieving the very best from your machinery and for your business. For those customers who we have worked with over the years and continue to do so we appreciate your support and are excited to showcase our latest product offerings.

This year, we are planning an extensive show and event programme to make sure you have the best opportunity to meet our team and see our machines doing what they do best. Please keep an eye on our social media and website for the latest updates in the months ahead.

Our company values remain at the forefront of our recent changes and developments, and hope that our team ethics: Committed to Service, Trust & Respect and Teamwork create a solid foundation for our business and stand us apart as your local and trusted machinery supplier.

In this edition we are excited to introduce the NEW T7 Long Wheel Base with PLM Intelligence. Launched at the EIMA show in late 2022 this tractor pushes operator comfort and driver experience to the max and we look forward to our first T7.300 demonstrator arriving soon! Read more on pages 4 and 5.

Ready for pre-season Spring delivery we have a wide range of New Holland and Kuhn Grassland machinery available, from Tedders, Rakes, Mowers, Square and Round Balers. As a Kuhn Baler Centre, Sudbury depot offer a first class customer experience helping you to choose the right baler for your business. View our range of Grassland equipment from pages 6 - 12.

To help you choose the right machine, why not put it to the test?! On page 13 see the latest Kuhn equipment, JCB iCON Fastrac, JCB 542-70 Telehandler and New Holland tractors we have available for demonstration. Supported by our dedicated demonstration team, they will help answer any questions and show you how to use and gain the optimum settings on the machine.

On page 14 meet our Harvest Product Specialist Nick Wells. Nick's extensive knowledge of harvest machinery will give customers excellent

support at the most critical times of the year. This year we have a CR8.80 with a 30ft Vari-feed header; a CR9.90 with a MacDon 35ft header and FR780 Forager available to demo so please contact Nick to get booked in.

On page 27 see our latest depot developments. We are pleased to announce RVT Denbigh depot is NOW OPEN, AR AGOR, the full and rapidly expanding team is on hand and ready to support your business needs, from parts, service and repairs, to machinery sales. Our JCB territory has also expanded and we are looking forward to serving customers throughout Cheshire from our Middlewich depot.

Since the last magazine we have had some exciting internal promotions and new employees join the team, see pages 28 - 29.

Precision Farming is an important part of our business and we are proud to offer a dedicated RVT Precision team to support this sector, read an overview of there recent activities on pages 30 - 31.

RVT Groundcare has an exciting Spring season ahead with a new range of Hayter, Toro, Countax lawn mowers, and now at RVT Sudbury, Iseki mowers and compact tractors. We have specialist groundcare service technicians to support the full range, more details are on pages 32-33.

And finally, as I write this the RVT Isuzu team have returned from the Isuzu dealer conference as award winning Isuzu Dealer of the Year in Region 2 for the second year running and Contract Hire Dealer of the Year runners-up. A fantastic achievement for the team, recognising the high standards of customer service they offer and a great start to the year for them ahead of building developments as a new Isuzu showroom, workshop and aftersales department gets underway.

We hope you enjoy this edition of the RVT magazine and I look forward to meeting you all in the season ahead.

**Matt Mulligan**  
Managing Director

## RVT NEWS

### JCB TERRITORY HAS EXPANDED IN TO CHESHIRE

Rea Valley Tractors are excited to announce they have expanded their JCB territory into Cheshire for all sales, parts, service, repair and warranty. Headed up from their new Middlewich depot, RVT 's experienced local team will offer the highest level of support with a full range of JCB agricultural machines.

RVT have been a JCB Agriculture dealership for over 15 years in Staffordshire, Derbyshire, Shropshire and Mid Wales, and their Sudbury depot was awarded a JCB Centre of Excellence in November 2022.

JCB is at the forefront of the RVT business which brings dedication and expertise to the full range of JCB Agricultural machines, offering the highest level of support in our industry.

RVT will be on the road with an extensive demo and event calendar; and welcome customers new and old to have a chat with the team and learn about the company's ongoing development and new product range across their seven depots.

Read more about the Middlewich depot and recent depot updates on page 27.

### ISUZU DEALER OF THE YEAR (REGION 2) FOR THE SECOND YEAR ON THE ROW

RVT are delighted to announce we have won Isuzu dealer of the Year (Region 2) for the second year in a row. Announced at the Isuzu dealer conference in January, we also were recognised as Contract Hire Dealer of the Year runners-up. Based at our Shrewsbury depot and headed by General Manager Scott Thomas, the awards recognise RVT Isuzu's customer service and commitment to the Isuzu brand throughout our area. Read more about Isuzu on pages 34-35.

### COMMITTED TO SERVICE

Committed to consistently delivering the best service possible for both employees and customers.

### TRUST & RESPECT

A positive environment where energy and enthusiasm are matched by opportunity and ambition.

### TEAMWORK

A unified collaborative effort to achieve a mutually beneficial outcome

**NEW**

## NEW T7 LONG WHEELBASE

WITH PLM INTELLIGENCE™

### MORE POWER. MORE COMFORT. MORE CHOICE. SAME COMPACT DIMENSIONS.

The new five model T7 Long Wheel Base with PLM Intelligence™ range is packed with even more features and upgrades.

An all-new, spacious Horizon™ Ultra cab. Bigger 2.05m tyres. New axles and upgraded Auto Command™ transmission and improved Performance with the new T7 Long wheelbase.

It builds on the legacy of the T7s tractor range to deliver allround top performance and comfort demanded by today's largest contractors and arable farmers.

Specify the Deluxe package for increased comfort and cutting edge technologies or the Elite package for the ultimate efficiency and automation with a selection of the most innovative features. A further option for the Elite package is the luxury Blue Power version with its distinctive metallic midnight blue paint and exclusive branding.

### NEW HORIZON™ ULTRA CAB

The new Horizon™ Ultra cab the quietest tractor cab in the industry, protecting the driver from the external environment.

The original Horizon™ 4 pillar cab set new benchmarks in the industry. This cab design is all about creating more space for the operator internally with an enlarged frame. More storage space with integrated and open areas and clearer vision. The feeling of space is enhanced by clever design of the frame and cab trim.

<b>+ 7.5%</b>	<b>+ 11%</b>	<b>+ 33%</b>	<b>+ 14%</b>
cab volume	glass area	wider cab entry	larger door

### FRONT AXLE SUSPENSION

The advanced Terraglide™ semi active suspension receives multiple inputs to deliver the best tractor stability. The driver can customise the suspension, choosing between 3 levels of ride control.

### CAB SUSPENSION

The optional electro hydraulic Semi-Active Comfort Ride™ allows the cab and driver to be really isolated from the movements of the chassis. The actively controlled electro-hydraulic self leveling suspension has a sensor on the cab frame as well as monitoring acceleration and deceleration rates. 3 levels of ride can be selected for customising the suspension.

### NEW SIDEWINDER™ ULTRA ARMREST

Fully configurable controls deliver a true driver experience thanks to sophisticated features that are easy and intuitive to access and use. Throttle, transmission, hydraulics, draft, autoguidance.

### NEW PLM INTELLIGENCE™ AND NEW INTELLIVIEW™ 12 MONITOR

The 12" model with its sleek, automotive 'dash' styling, intuitive display and modern design, is the benchmark of the future.

### FULLY CUSTOMIZABLE SCREEN LAYOUT

### INFOVIEW™ OR CENTREVIEW™ INSTRUMENT DISPLAY

### INTELLITURN™ END OF ROW TURNS

Automate the steering during a headland turn, intelligently selecting the optimum turnaround route to minimising time and headland compaction.

### INTEGRATED LARGE SQUARE BALER CONTROL

### ALL ROUND SMARTNESS

### CUSTOMSTEER™ VARIABLE RATIO STEERING

### HEADLAND TURN SEQUENCING II

### SMART FENDER CONTROLS

### THE 6.7 LITRE FPT INDUSTRIAL NEF ENGINE

The FPT Industrial NEF engine features ECOBlue™ HI-eSCR 2 technology for Stage V compliance. It delivers up to a massive 300hp whilst maintaining impressive fuel efficiency, with maximum torque available at a mere 1300rpm.

### THE TRANSMISSION OF POWER

The latest T7 Long Wheelbase features a new front axle, upgrades to the rear axle to the proven and efficient Auto Command™ CVT transmission.

### 4 RANGE AUTO COMMAND™ TRANSMISSION

### 4 SPEED REAR PTO - reduce noise, wear and fuel usage.

### LARGE DIAMETER TYRES - With tyres up to 2.05m diameter.

### HIGHER CARRYING CAPACITY - Optional on the T7.260 and T7.270, standard on the T7.300, new axles provide up to 12.5% greater carrying capacity.

### ENDURANCE

LONGER SERVICE INTERVALS - 750 hours. Transmission service intervals are aligned to 1,500 hours.

IMPROVED FIELD AUTONOMY - The new 465 litre fuel tank is 18% larger.

24 LED LIGHTS FOR 24-HOUR WORKING + LED ROAD LIGHTS & DUSK SENSOR

Contact your nearest RVT depot for more details.

# NEW HOLLAND GRASSLAND

EQUIPMENT READY FOR PRE-SEASON SPRING 2023 DELIVERY!

## New Holland Single Rotor Rakes PROROTOR™ 320 / 420

Side delivery of the crop with an adjustable swath curtain to match the swath width.

PROTED 320TM : Side delivery, 3.15m working width, 3-point headstock, 2.95m Transport width, 540 rpm PTO speed, Minimum PTO Power 15/20 kW/hp(CV), 4-wheel bogie axle for smooth operation in undulating terrain and Advanced wide-track axle.

**PROROTOR™ 320 £4,950**

PROTED 420TM : Side delivery, 4.15m working width, 3-point headstock, 1.9m Transport width, 540 rpm PTO speed, Minimum PTO Power 26/35 kW/hp(CV), 4-wheel bogie axle for smooth operation in undulating terrain and Advanced wide-track axle.

**PROROTOR™ 420 £POA**

## New Holland 6 Rotor Tedders PROTED™ 690 / PROTED™ 760

Mounted Rotor Rakes with optimised horsepower/width ratio.

PROTED 690™: 6 rotor, 6.9m working width, 3-point headstock, 2.95m Transport width, 540 rpm PTO speed, Minimum PTO Power 50/68 kW/hp(CV), Hydraulic folding & lifting on head turns and tine safety system.

**PROTED™ 690 £9,750**

PROTED 790™: 6 rotor, 7 tine arms per rotor, 7.6m working width, 3-point headstock, 2.95m Transport width, 540 rpm PTO speed, Minimum PTO Power 60/82 kW/hp(CV), Hydraulic folding & lifting on head turns and tine safety system.

**PROTED™ 760 £11,250**

Rigorous manufacturing and quality standards are upheld during manufacture to deliver outstanding quality, durability and reliability of these rakes.

## New Holland Hay Liner 275 Conventional Baler

Produces consistent firm bales. The long bale chamber with long plunger stroke and high plunger speed combined ensures a first class quality bale. Adjustable top and bottom chamber rails and adjustable bale case doors allows for the optimum setting and required density.

**READY TO START AT ONCE**

A swift pick-up lowering with the hydraulic pick-up lift.

**PROVEN OVERALL STRENGTH**

Hard-surface material prevents wear of the driving gears

**REDUCED DAILY DOWN TIME**

A self-contained, centralised, hand pump operated oiling system for the knotters reduces wear and daily maintenance. The six-ball twine box keeps the baler going on the longest of baling days.

**"POWER PIVOT SUPPORT"**

for the three-joint PTO allows sharp turns with maximum safety

**ROBUST**

Draw bar that is directly connected to the baler axle.

**WIDER 2M SUPER SWEEPTM PICK-UP**

**SMOOTH CROP FLOW BOOSTS DAILY OUTPUT**

Shear bolt, overrun clutch and slip clutch on the flywheel, compression spring on the feeder fork and shear bolt on the knotted drive. The belt drive acts as a protection against overload.

**BC5070 £28,000**

**T 03300 568800**

## New Holland Round Balers

### ROLL-BAR 125 ROTOR CUTTER

1.25m diameter bales. The proven characteristics of simple reliable drive-lines, easy maintenance and high crop flexibility have been improved and enhanced to meet the needs of today's farming operations. All main drive chains have been strengthened to ensure maximum reliability in addition to new sealed bearings in key areas. 2 metre wide pick-up with closely spaced curved tines and this baler features the CropCutter™ system cut the crop.

**NEW INTUITIVE BALE COMMAND™ PLUS II MONITOR**

10 cm backlit screen, select between twine or net wrap on the screen from the comfort of the cab. Memorise up to 20 individual bale count records for accurate record keeping

**PERFECT BALE SHAPE**

A heavy-duty floor roll provides a sure start for the bale. The core of the bale is softer than the outside for good aeration.

**ROLL-BAR™ SYSTEM**

Baler rotation bars become embedded in the bale, ensure positive turning. This allows the baling of any crop, whatever its condition, whatever the bale density required

### ROLL-BAR 125 ROTOR CUTTER

**£28,800**

### ROLL-BELT 150 SUPERFEED

Minimum PTO power 60 / 70 / 100hp  
Bale diameter min. / max. 90 / 150cm  
**SUPERFEED™** enables straight through processing, to maintain long unbroken straw

**BALE QUALITY**

The Roll-Belt guarantees top drawer bale quality. Uniform wrapping.

**EASE OF OWNERSHIP**

The one piece side and front shields mean operators have unfettered access to all service points and moving parts to keep the baler in tip-top condition.

**PRODUCTIVITY  
ENHANCING DROP  
FLOOR**

**SMOOTH  
FEEDING ROLLER  
WINDGUARD**

**FOUR ENDLESS  
BELTS FOR BALING  
EFFICIENCY**

**IN-CAB DENSITY  
CONTROL SYSTEM**

**OUTSTANDING CAPACITY**

Redesigned pick-up to clear the field **20% faster**, more crop is baled at optimum condition

**INTELLIBALE™ TECHNOLOGY**

For baling automation, enables the baler to control the tractor's forward motion: bringing it to a halt when it is ready to wrap the bale, raises and closes the tailgate when the bale has been ejected and then gives a signal to continue baling. Drop floor technology, with density control functions, increase productivity.

### ROLL-BELT 150 SUPERFEED

**£36,000**

**ELECTRONIC CONTROL OF  
NET WRAP SYSTEM**

**ELECTRONIC CONTROL OF  
NET WRAP SYSTEM**

**FOR TRACTORS OF BETWEEN  
105 TO 115HP (guide only)**

### ROLL BALER 125 COMBI

Designed to make it faster and easier to produce wrapped silage and haylage bales in small fields and in difficult terrain. Rugged and reliable, Roll Baler 125 Combi are built tough to work tough and meet the demands of larger scale livestock and contracting businesses, with low operating costs.

### ROLL BALER 125 COMBI

**£65,000**

## New Holland Square Baler

### BIGBALER 1290 P HIGH DENSITY

**LOOPMASTER™**

120 x 90, 6 string bale size, 2.23m pick up with 5 cam steered tine bars, Smart shift gearbox with 2 speed start up. Large fly wheel, High-capacity plunger (465kg) delivering 48 strokes/min with a stroke length on 748mm. Pre chamber to start perfect bale shape. Smart fill driving indicator, LoopMaster™ double knotting system, 36 twine ball storage, 4.05m bale chamber with high density yolk achieved by 7 double acting cylinders, electronic bale length, full and partial bale ejection. Shear bolt needle yolk fool proof protection, Steered twin axle with Hydraulic Suspension, Verdestein 600 55 R26.5, Toolbox, road lights and beacon.

#### POWERFUL IMPRESSIVE PLUNGER

Improved plunger design, delivers a 748mm stroke exerting extreme plunger force – a whopping 58% more than Plus models, for even denser bales.

#### CENTRALISED CONTROL

IntelliView™ IV colour touchscreen display enables operators to control the main functions from the screen, such as bale density, bale length and PTO engagement.

**CALL FOR A DEMO**

#### THE FUTURE OF BALING STYLE

Next generation styling, sweeping lines also including function with wide opening side and front shields for easy access when servicing.

**22%**  
**DENSER BALES**

*than standard conventional balers*

#### BUILT FOR LONG-LIFE

New super duty main gearbox, two drive gears for increased durability and more efficient balanced power load distribution.

Further extend long life Hardox wear plates are standard on the bale chamber bottom plate.

#### LONGEST BALE CHAMBER

At 4.05m, the baler chamber is the longest in the segment to ensure consistency.

#### TRUE DAY AND NIGHT VISIBILITY

A full LED 360° lighting.

**IN STOCK**

#### GETTING UP TO BALING SPEED QUICKLY

The award winning SmartShift™ gearbox features two-speed start-up technology to deliver even smoother baler engagement.

#### AUTOMATE TO ENHANCE PRODUCTIVITY

IntelliCruise™ technology controls the tractor's forward speed through ISOBUS increasing throughput by 9%, reducing fuel consumption by 4% and optimises feeding rate

#### OUTSTANDING PICKUP VISIBILITY

#### SUPERIOR AND HIGHLY EFFICIENT 15/29 KNIFE CROPCUTTER™ SYSTEM

#### HEAVY DUTY FRAME

New robust frame designed to manage the higher density loads.

The new main gearbox is mounted to the top beam to reduce crop accumulation. The drawbar is not part of the main frame, for height adjustment.

## New Holland Square Baler

### BIGBALER 1290 PLUS

120 x 90cm, 6 string Bale size, 2.23m pick up with 5 cam steered tine bars, Large fly wheel, High-capacity plunger (384kg) delivering 48 strokes/min with a stroke length on 710mm. Pre chamber to start perfect bale shape, Smart fill driving indicator, LoopMaster™ double knotting system, 32 twine ball storage, 3.4m bale chamber under pressure, electronic bale length, full and partial bale ejection. Shear bolt needle yolk fool proof protection, Steered twin axle with Verdestein 560 45 R22.5, Toolbox, road lights and beacon.

**KUHN SB 1290  
iD High-Density  
Baler**

**KUHN BALER CENTRE AT RVT SUDBURY**

01283 821345

**HIGH-DENSITY  
BALING AT ITS  
FINEST**

Designed and built to last for all crop conditions. Produces the perfect bale shape and densities to match your requirements with the proven KUHN INTEGRAL ROTOR intake technology.

**AUTOMATIC  
GREASING  
SYSTEM**

SB 1290 iD is designed to produce bales with an extremely high density in all crop conditions. Thanks to the patented TWINPACT plunger technique, the baler has a lower power requirement and lends to more profitable baling operation.

Apart from the density, the bale channel, driveline and transmission have been upgraded which lends to further cost savings for the operator. A 200hp tractor is more than capable of producing 500kg plus bales, providing you significant fuel savings.

**'INTELLIGENT-DENSITY'  
MODEL**

Designed to produce bales (120 x 90) with up to 25% higher bale density in tough dry straw conditions compared to conventional large square balers.

**ISOBUS  
COMPATIBLE**

**DOUBLE KNOTTING  
WITH ELECTRONIC  
MONITORING**

**The TWINPACT:**

- Ensures intelligent, efficient bale compaction whilst avoiding high peak loads on the machine.
- Gives you the possibility to work with similar tractor sizes as with conventional 120 x 90 balers.
- Produces bales that are 25% heavier in dry crop conditions.

**KUHN FBP 3135 Baler-wrapper  
Combination**

01283 821345

This combination creates the highest bale quality at the lowest cost. A high quality wrapped bale is achieved through film binding and 3D wrapping techniques. The TWIN-reel film binding and INTELLIWRAP contribute to the lowest film cost per bale.

**ISOBUS  
COMPATIBLE**

**REDUCE COSTS**

With the TWIN-REEL film wrapping system SAVE a minimum of 37% on film binding costs. The patented KUHN film binding system uses two 750mm stretch-film rolls and gives a much high stretch to reduce costs by 37%, reduce the number of roll changes and reduce time.

Watch the video:  
TWIN-REEL film  
binding explained

**ROBUST BALE  
CHAMBER**

18 POWERTRACK rollers generate high densities and reliable bale rotation all crop conditions. The rollers have built in scrapers to push the material out the way.

**INTELLIWRAP**

Distributes film uniformly and efficiently across the entire surface of the bale. Use just enough film, with Intelliwrap determine exactly the number of layers required, don't waste film and use just enough to keep the feed quality high during bale storage.

## VB3165 Round Baler

Bale diameter 80-160cm  
Bale width 120cm

The KUHN VB 3165 Premium model is designed to work in the toughest conditions. Ideal for custom operators who need extra density in straw. Built for high-volume baling, these models feature heavy-duty components to keep you producing rock-hard bales, bale after bale, day after day.

The rotor disengagement and DROPFLOOR technology ensure a fast clearance in case of a blockage and enable to quickly continue baling.

The VB range can be equipped with a KUHN camera system to provide optimal visibility and safety around the machine. There are two kits available, one kit is compatible with the CCI 1200 terminal, the other one consists of a separate monitor and a camera.

**01283 821345**

### PROGRESSIVE DENSITY

The proven system increases tension as the bale grows providing a firm bale with a tough outer shell.

### ROBUST DRIVELINE

High quality IWIS chains + 1 1/4" 20BH primary driveline with chrome hardened pins.

### INTEGRAL ROTOR TECHNOLOGY

### HEAVY CROP ROLLER WITH WINDGUARD

### PENDULUM PICK-UP

## KUHN Maize Drill MAXIMA 3 RXe

- 8 row
- 75cm row spacing
- 3m transport width
- 120-180kg ground pressure capacity
- 50L hopper capacity
- Type of seeds: maize, corn, sunflower, beets, rapeseed, sorghum, soybeans

The load-bearing wheels on the front of the chassis on the MAXIMA 3 RX make it easier to move stones between the seeding units and provide better soil adaptation even on slopes. The chassis in three independent parts offers excellent ground following even in difficult conditions.

**Book in a demo ready for the Maize drilling season ahead!**

**T 03300 568800**

Exceptional stability and ensures a very regular seeding depth thanks to its powerful furrowing system. In addition, the seed drop point is where the gauge wheels touch the soil for perfect seed placement. The new parallelogram in moulded parts clearly reinforces the robustness, the fertiliser applicator as well as the entire plate of the unit has also been modified for greater longevity. The MAXIMA 3 also has fewer wear parts and a greater travel. It has easy and intuitive settings, adjustments are done without tools for more comfort and speed. GPS automatic row shut-off to prevent overlaps in the points improves yield and reduces seed costs.

PRECISION UP TO 10 KM/H

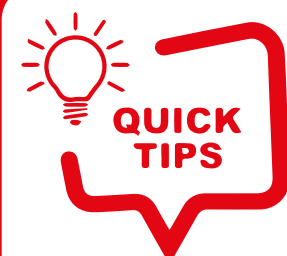

**BOOK IN A DEMO NOW!**

### OPTIMUM PRECISION

For economies of scale, regular seed placement and high yields. The MAXIMA is a robust seeding unit for long service life and outstanding reliability, it offers easy and quick adjustments and maintenance of the seeding unit and higher seeding speed with optimised precision up to 10 km/h.

### ELECTRIC DRIVE

Offers adjustment of the seedling population from the cabin, modulation of seeding application rate and row shut-off by GPS/manually. A 48V system ensures smooth and continuous rotation for high precision even during, vertical accelerations, acceleration and deceleration on headlands or dusty environments.

**Make sure your drill is in tip top condition before the season starts!**

Check your drill coulters in between the discs, the disc diameter, bearings, scrapers and brushes.

If you would like replacement parts please contact Ed Worts or your nearest RVT depot Parts Department for a competitive quote.

## HARVEST PRODUCT SPECIALIST

Nick Wells

Rea Valley Tractors Harvest Product Specialist Nick Wells offers Sales, Service and Precision support covering the full New Holland harvest range. Starting out as Demonstrator/Machinery Installer with Precision Farming, 13 years ago, Nick gained full in-depth knowledge of precision technology and then moved into Sales in 2016. Nick's extensive knowledge of harvest machinery gives customers a high standard of support to agri-businesses throughout the life span of the machines.

From offering expert advice, to helping to choose the right machine for your business, through to full installation and setup, Nick will help obtain optimum output, uptime and efficiency of your harvest equipment. During harvest Nick will be on hand for season setup and optimisation and will offer full operational support, either remotely or in-field, so you can be confident of a complete back-up support package with Nick and the RVT team.

'We are here to support your business and now is the time to get ready for harvest with valuable pre-season checks and maintenance on your harvest machinery. Please contact myself directly or your nearest RVT depot for a competitive quote, we have a team of specialist harvest technicians across all RVT depots for any maintenance and repairs to ensure your equipment is prepared and ready for the season ahead.'

'With such an array of New Holland harvest machinery to offer we will look forward to organising some Harvest Evenings later in the year with a focus on the New Holland combines and balers. We encourage you to attend these harvest events as they are a great way not only to gain more insight into these machines, but to also ask any questions and give feedback. It is important to us that we listen to our customers so we can continually develop our harvest experience,' says Nick.

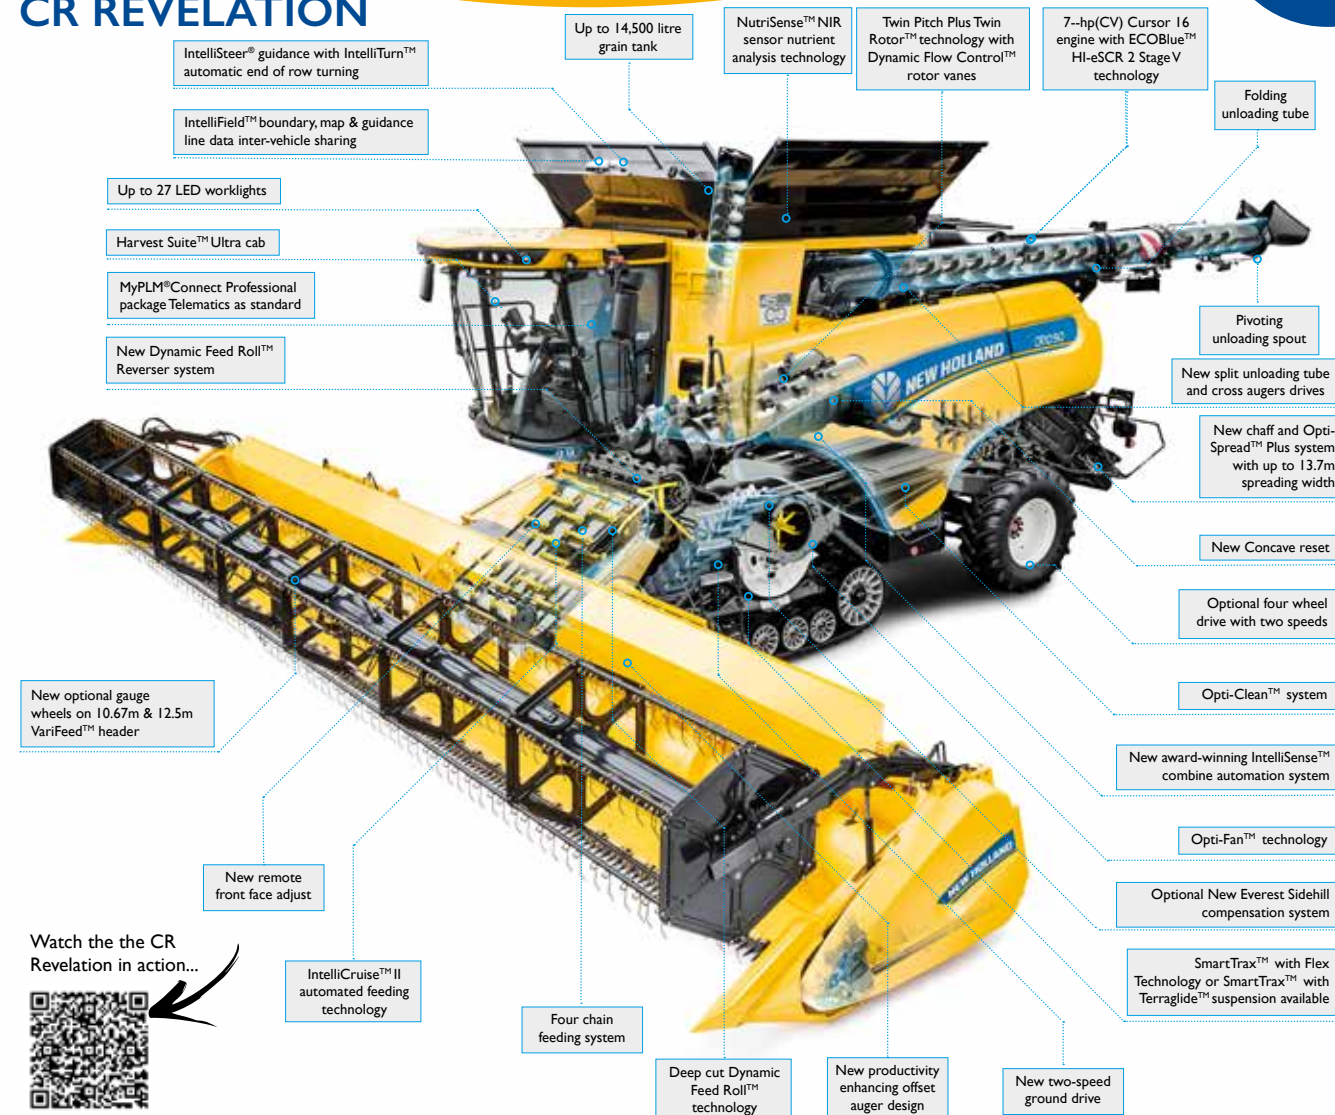

Once harvest is over it doesn't stop there, it's time to clean & blow down the machines and Nick will also be there to support your post-harvest checks and help review the performance and crop yields using the Precision technology available. A full data analysis will bring insights into your harvest and help to make valuable decisions for next year.

Get the full harvest support package and call Nick today 07850 003586 to discuss your harvest machinery requirements.

## DEMO FORAGER FR780

### VARIFLOW™ TECHNOLOGY

Streamlined processor to trailer crop flow, banishing stagnant crop, when harvesting grass, to the history books. The Variflow™ system enables the operator to alter the position of the blower depending on the crop being harvested. The patented system mounts the CP and the blower on a pivoting frame. When in corn position the CP is rotated into the crop stream for thorough kernel processing. When you change to the hay position, the CP swings rearward and the blower drops down to be closer to the cutterhead, eliminating the dead spots in the crop channel and enhancing blowing performance.

Watch the Variflow™ in action...

Watch the FR forager in action...

FR Forage Cruisers benefit from the productivity-enhancing features of FPT Industrial Cursor 16 engine equipped with Stage V-compliant ECOBlue™ HI-eSCR 2 technology with outstanding performance and fuel economy. The proven ECOBlue™ technology uses AdBlue to transform the harmful nitrogen oxides contained in the exhaust gas into harmless water and nitrogen. This after-treatment system is separate from the engine which means the engine only breathes clean, fresh air. The benefit of this is clean-running, powerful units that offer improved performance and enhanced fuel economy.

### FPT INDUSTRIAL CURSOR 16 ENGINE

- Engine: FPT Cursor 16
- Displacement cu. in. (L): 970 (15.9)
- Injection system: Common Rail
- ECOBlue™ HI-eSCR 2 system (Selective Catalytic Reduction)
- Max. engine power @ 1700-1900 rpm - 570/775
- ISO TR14396 - ECE R120 [kW/ hp(CV)]
- Maximum Torque @ 1500 rpm - 2451 (3323)
- ISO 14396 - ECE R120ft. lbs. (Nm)
- Torque rise (2100 to 1700 rpm) 33%
- Approved biodiesel blend™ B5
- Power Cruise™ II system

\*Developed by FPT Industrial  
\*\*Biodiesel blend must fully comply with the latest fuel specification  
EN14214:2009 and operation is in accordance with operator manual guidelines

## TILLY TRAILER CERTIFICATE

### DOES YOUR TRAILER PASS THE TEST?

It is a legal requirement under PUWER 98 Regulations for agricultural trailers to be in roadworthy condition, well maintained and in good working order with records of maintenance held by the owner.

The Tilly Trailer Pass ensures trailers are maintained to the legal standard. An annual 18 point inspection is carried out by authorised technicians. Once completed a Tilly certificate is fixed to the tailgate of the trailer to clearly display a Tilly pass unique number. The number is recorded with the trailer chassis number for a thorough record of the maintenance.

Please call RVT NEWPORT on **01952 822922** for more information or to book in a Tilly Trailer test.

## IS YOUR WARRANTY COMING TO AN END?

Concerned with potential repair costs in future?

-  Talk to Nigel about a RVT SHIELD extended warranty for up to 2 yrs/ 2,000hrs for your JCB or New Holland
-  RVT SHIELD extended warranties also available on a JCB or New Holland up to 5,000 hrs/5 yrs

**RVT SUDBURY T 01283 821345**

RVT Sudbury has undertaken a revamp inside the depot, taking out the old parts office and counter to create an open plan Aftersales department office space, housing the parts, service and admin team. A wall has been knocked through from the office into the workshop to give easy access and given more storage and an office area for the workshop team. The depot has had a fresh coat of paint, new floor, signage and new counter units and desks to make it feel really clean and new! The new layout has abled the departments to merge as one, ultimately giving an even higher and much improved customer experience to the depot.

## GROUP

**Matt Mulligan**  
Managing Director

**Steve Petford**  
Group Managing Director

After an incredibly busy year following the transition to New Holland, along with expanding their JCB & Kuhn territories, RVT are delighted to announce that Matt Mulligan has been promoted into the role of Managing Director.

As part of our ongoing strategy to develop leaders and create internal opportunities, Matt's experience across various departments in the last six years at RVT, together with vast industry experience has given him the skill base to step up and take the helm of the RVT business.

Originating from Lancashire and being brought up on the family farm, Matt is no stranger to the trials and tribulations of the agricultural industry. Matt is a Harper Adams graduate and worked at JCB for 12 years both in the UK and abroad.

Matt will focus not only on developing internal talent but on meeting and exceeding customer expectations along with providing a service to customers that RVT has built its reputation on for decades. Matt will work alongside Steve Petford, Group Managing Director and will be focusing on providing stability and growth within the business.

**Congratulations to the following RVT Team members who have moved into new roles at RVT, after showing dedication and professionalism throughout their time at the company....**

# FARM SMARTER. COMPLETE PRECISION.

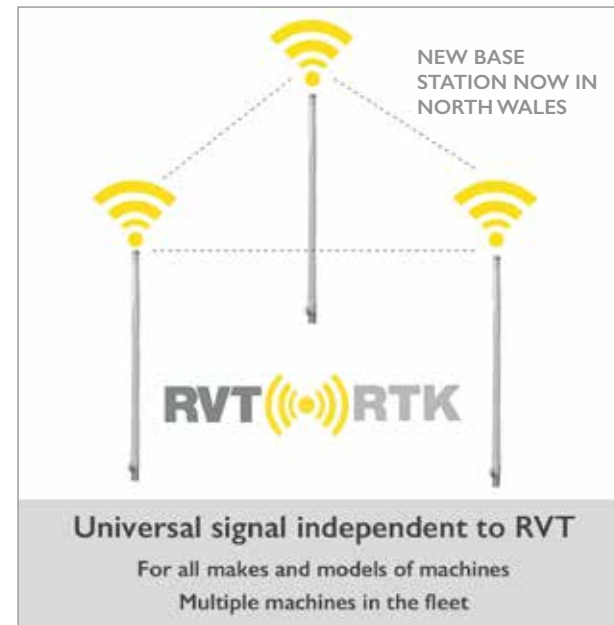

## RVT PRECISION UPDATE

Hello we have had a busy few weeks learning about the CNH Precision Farming product line up and what to expect from 2023. Our Introduction Event to the product range has been a great success with over 65 customers able to ride and drive to try out the technology. We gave an overview of where CNH are heading with their technology portfolio, customers were surprised to see the technology on offer currently, and their plans for the future.

As we venture into spring the team will be busy installing new technology onto machines and getting current technology updated and ready for the field. We have some interesting projects on the go such as converting a seed drill to full ISOBUS to enable variable rate and section control, implement guidance on more trailed machines, sprayer upgrades on older sprayers enabling section and rate control and many more. Keep a look out for what we can do and things we are up to via our social media pages.

We have recruited two additional members of the team with Harry Hamer and Matthew Meredith joining at the end of last year. Both will bring a great deal of technical knowledge and experience which will enable us to keep up with customer demands and uptime in the field. Projects are becoming more technical these days with some very bespoke installations and by having a team capable of fulfilling our customer requirements we are set up well for the future.

For any help and support please get in touch, we are here to support all makes and models of machinery with precision farming technology. Our RVT RTK network is fully operational with a series of networked stations across the country providing greater accuracy in the field, especially for those who in various locations.

## MEET THE RVT PRECISION TEAM

**Carl Atkins**  
RVT Precision Farming  
Operations Manager  
M: 07375 088425

**Tommy Adams**  
RVT Precision Manager  
M: 07794 345471

**Matthew Meredith**  
RVT Precision Farming Specialist  
M: 07398 425473

**Harry Hamer**  
RVT Precision Farming Specialist  
M: 07535 021535

As a qualified Trimble technician Carl has extensive knowledge of CNH systems and carries out technical installations and support. Carl specialises in our AgLeader product solutions and bespoke installations.

Tommy has been with the company for over 9 years working with customers on many projects from implement steer to data management. Previous to RVT he was one of the first users of section control with spreaders and sprayers, variable rate applications, map processing and ISOBUS technology.

With a solid agricultural background and specialist in wiring Matt has a good foundation and passion for working with CNH Precision Farming technology.

Harry has many years previous experience of Trimble and CNH systems bringing valued knowledge to the team.

## TAKE A MORE TARGETED APPROACH

### Slurry Nutrient Analysis & Application Rate Control

- Monitor Nitrogen application rates
- Build a reliable database of data
- Yield potentials known, only in the spatial distribution
- Monitoring of yield, product quality and nutrient use
- Data to help Optimise the production of crops
- Better utilization of manure
- ISOBUS compatible
- In combination with the NIRXACT rate control sensor

Calibration Curve	TS	N	P <sub>2</sub> O <sub>5</sub>	K <sub>2</sub> O	NH <sub>4</sub>
Cow Slurry	✓	✓	✓	✓	✓
Pig Slurry	✓	✓	✓	✓	✓
Digestate	✓	✓	✓	✓	✓
Mixed Slurry	✓	✓	✓	✓	✓

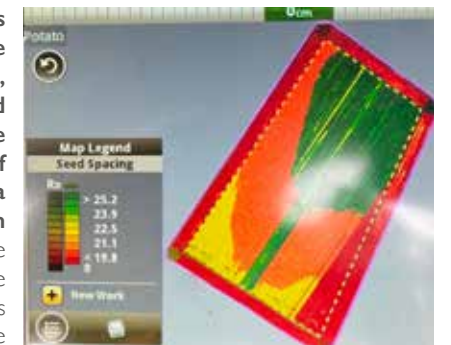

## VARIABLE RATE POTATO PLANTING

Utilising the on board technology and the data capture from specific in field applications can lead to understanding the full impacts of certain agronomic decisions. An example of this happened last year where James Heath trialled variable rate potato planting, something which hadn't been attempted in the past, to see the results during harvest and the impact it made, which was made possible by having yield monitoring installed on their Grimme harvester a couple of years ago.

The theory behind creating a variable rate seeding map was based upon soil types, the heavier the ground the seed rate was increased up to 10%. As the Grimme planter worked in seed spacing, the map had to be created using this format, for example a standard seed spacing would be 20cm which would then decrease to 14cm to achieve a higher seed rate. At the time of planting the seed spacing locations were recorded on the display and an as applied map created. This can then be used to directly compare to the yield

map. The results showed a more even yield map, with increased yield in the poorer areas of the field with a more uniform tuber size. In the poorer areas there were less tubers per plant, but more plants/hectare which positively impacted yield. This particular field was the best performing in terms of yield averaging 60t/ha. Variable rate planting is going to be rolled out across more fields this year.

## RAVEN RATE CONTROL MODULE (RCM) DRILL CONVERSION

Conversion of a mechanical Kuhn 3m combi drill to fully electric metering and ISOBUS compatible enabling:

- Variable rate seeding
- More accurate section control
- GPS forward speed

The system uses the existing sensors such as hopper level sensor and fan speed sensor to give a much improved operator control and experience.

**GET CONNECTED**

Trade in your radio RTK and upgrade to RVT RTK with modem and get the first year's modem SIM card & licence FOC

### PUT YOUR FEET UP! LET THE iMOW MOW YOUR LAWN FOR YOU!

#### iMOW® ROBOTIC MOWER

The iMow doesn't just mow the lawn, it also provides fully automatic lawn care tailored to your garden - meaning you can send it out to mow at a time that suits you.

Once the iMOW® has finished mowing or it's powerful lithium-ion battery needs charging, the robotic mower will automatically return to its docking station to charge. And because iMOW® works so fast, you can enjoy your lawn unhindered.

All STIHL iMOW® robotic mowers come with a 5 year extended warranty

Call or visit your local RVT depot for a competitive quote.

#### CONNECTIVE TECHNOLOGY

Wherever you are, the iMOW® app gives you full control of your mower via your mobile device.

- Configure the mowing plan
- Pause or start new mowing
- Read status messages and performance data

Download iMOW® app from App Store / Google Play.

# RVT COMMERCIAL VEHICLES

## STRONGER. SMARTER. SAFER.

RVT Commercial Vehicles have been part of the Isuzu network now for 5 years having founded the dealership at the Shrewsbury depot in 2017. Rea Valley Tractors are known for their service and support to agriculture in Shropshire and surrounding areas. Branching out into the automotive industry RVT Commercial Vehicles wanted to follow with the same core values, being dedicated to service and supporting our loyal customer base.

With our strong values at the forefront of our business RVT Commercial Vehicles were awarded Region 2 dealer of the year 2022 for the second year running and recognised as Contract Hire Dealer of the Year runners-up and we are proud to continue to deliver a UK leading customer service.

RVT Isuzu have a fresh new rebrand have some exciting plans for the future of the business including a new Isuzu showroom, workshop and aftersales department in 2023.

Despite the challenges of supply chain in the industry RVT Commercial Vehicles have managed to secure a steady pipeline for 2023.

Contact RVT Isuzu to discuss your requirements on sales, service or parts 01743 289200.

Visit [RVTIsuzu.com](https://www.rvtisuzu.com) to view our latest used Isuzu's IN STOCK.

RVT ISUZU

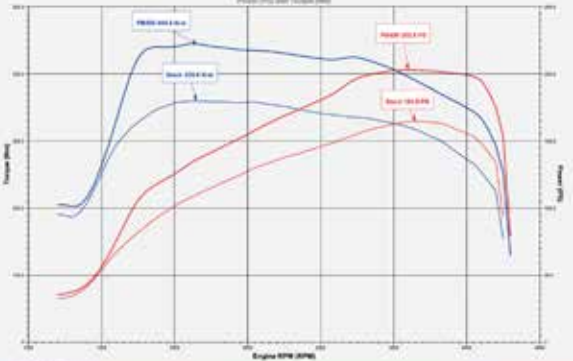

All fuel consumption and emission values are based on the new WLTP (Worldwide Harmonised Light Vehicle Test Procedure) test cycle which uses real-world driving data. Official fuel economy for the standard Isuzu D-Max range in MPG (l/100km): Low 25.1 - 27.6 (10.2 - 11.2), Mid 31.4 - 36.4 (7.8 - 9.0), High 36.0 - 39.4 (7.2 - 7.8), Extra-High 29.0 - 30.8 (9.2 - 9.7), Combined 30.7 - 33.6 (8.4 - 9.2). CO<sub>2</sub> emissions 220 - 243g/km. Price shown is an Isuzu D-Max V-Cross Double Cab, vehicle on the road price with manual transmission. All prices shown include delivery, number plate, 12 months road fund licence and first registration fee, excludes VAT and metallic paint finish. The Award-Winning Isuzu D-Max is smarter, stronger, safer compared to previous model. Terms and conditions apply.

**WHY NOT EXPLORE THE POTENTIAL FOR IMPROVED POWER, TORQUE AND DRIVABILITY?**

- Receive an increase in power of 41PS from 164PS to 205PS (Manual and Automatic) and an increase in torque of 85 NM from 359NM to 450NM
- More pulling power over a wider rev range, more overall power and a better driving experience
- The PB450 upgrade will not invalidate your Isuzu warranty
